

# GET HOOKED ON A Scottish Fisheries Management Career

"Sometimes wet, sometimes cold but still the best job in the world". That sums up a career in the Fisheries Management industry in Scotland. Salmon and freshwater fish are an extremely important natural asset for Scotland and a job in the Fisheries Management industry could see you looking after this invaluable resource. There are a wide range of highly respected employment opportunities with progression from research biologists to water bailiffs and wardens; from angling guides and ghillies, through to working at commercial sporting fisheries.

If you enjoy working outdoors and can combine your technical knowledge with your practical skills then a career in Fisheries Management is for you. You can be involved in every aspect of this work from monitoring and managing the fishery

habitat, assessing the level and condition of fish stocks through to working with the public at a commercial sports fishery. A diverse and rewarding career awaits you.

The qualifications structure is flexible. You can choose how and where you wish to learn. Whether you choose an academic qualification at college or university or follow the vocational route in the workplace, you will find a qualification and learning to suit you. This guide illustrates possible career pathways and demonstrates that there is a range of qualifications to help your own future career in the Fisheries Management industry in Scotland.
