Introduction

The workshop aims to increase trainees' knowledge of safety and good practice as well as outlining the legislative requirements for on farm medicines use. The course also aims to increase trainees' understanding about the different types of medicines used and how these relate to the common diseases relevant to their farms.

Overview in brief

1. Understand the following classes of medicine, what they do and when to use them:

- Vaccine
- Antibiotic
- Non-Steroidal Anti-inflammatory Drugs (NSAID)
- Anthelmintic.

2. Understand how an active health plan ensures effective product use.

3. Safe and effective administration of medicines.

4. Comply with medicines legislation and farm assurance requirements.

Who should attend?

This course is aimed at farmers at supervisor level (level 3 upwards).

What will be covered?

- Safely administer veterinary medicines to animals under their care
