

Health and Safety for the Workplace

At a glance...

Training (Only)

Duration Notes: 1 day

Introduction

Master the basics of Health and Safety for the Workplace with our interactive course.

Overview in brief

All of us must be on board with Health and Safety at Work. You'll get up to date knowledge and information on our course that will support a variety of sectors.

The result will be that you can help maintain a strong health and safety culture in your workplace.

The finer details

Our one-day training course will give you the grounding you need for your work environment.

Your employer will benefit from ensuring their practices, procedures, and people comply with health and safety legislation.

There will be a mixture of theory and practical sessions in aspects of health and safety at work and you'll get a certificate of training when you complete the course.

Who should attend?

If you are in the workplace, health and safety is key to any industry.
