

Health and Safety - Treework

At a glance...

Training (Only)

Duration Notes: 1 day

Introduction

Keeping safe working with trees or in the forest is the focus of our Health and Safety course.

Overview in brief

With a high risk of accidents and incidents in this sector, it's essential to have the correct procedures and training in place.

Our course will equip you to keep yourself and your colleagues safe when working with trees.

The finer details

This is a one-day training course. You'll learn about the specific needs relating to Health and Safety in your sector and look at a variety of scenarios you may encounter in your workplace.

Our course has been developed in line with the Forestry Commission policy and information provided by the Forestry Industry Safety Accord (FISA).

You'll receive a certificate of training when you have completed the course.

Who should attend?

You'll benefit from this course whether you are looking to join, are new, or if you're looking to progress in this sector.

What will be covered?

The topics covered are:

- An introduction to working safely in tree work
