

Clearing Saws up to and over 50mm

At a glance...

Training (with Assessment)

Duration Notes:

The expected duration for the course is one day, however please note this may vary according to factors such as level of experience, modules or attachments selected, or the ratio of instructors to learners.

Introduction

Cut down on risk at work with the Lantra clearing saw course.

Overview in brief

When a job is too big for a strimmer and too small for a chainsaw there is the clearing saw.

These versatile and powerful machines can make light work of plants up to small saplings.

Make sure that you are getting the most out of your machine in a safe and efficient manner by taking our clearing saw course.

The finer details

Clearing saws are used widely across many sectors for clearing overgrown ground cover.

Our course is a mix of theory and hands on teaching to ensure that when you have finished you know all that you need to know to start working with these powerful machines.

Our course is an ideal way of demonstrating that you and your employer have completed sufficient training to meet the Provision and Use of Work Equipment Regulations 1998 (PUWER).
