

AMBP Antibiotics in Sheep (E Learning)

At a glance...

E-Learning

Duration Notes:	2 - 2.5 Hours
Delivery Method:	E-learning
Recognised by:	Red Tractor
Prerequisites:	Internet access through PC, laptop or tablet.

Introduction

This training reflects current best practice in the use of antibiotics in farm animals.

Overview in brief

The course contains theoretical and practical information about antibiotic use and antimicrobial resistance (AMR).

Topics focused on include farm antibiotic management, responsibilities and best practice in responsible antibiotic use.

The finer details

Three modules must be completed. This must include two core modules, plus a module covering responsible and effective use of antibiotics in sheep.

Upon successful completion, a Lantra certificate of training will be available to download and print.

Who should attend?

This course is designed to train people in the responsible use of antibiotics in sheep.

This can include farmers, farm workers, and vets.

What will be covered?

There are two mandatory core modules that cover the safe and responsible use of antibiotics in sheep in depth.

Plus, there's an additional module focusing on the responsible and effective use of antibiotics in commercial sheep flock.

You must undertake all three modules to successfully complete the course.
