

Bed Bug Control (E-Learning)

At a glance...

E-Learning

Duration Notes: 2.5 - 3 Hours

Prerequisites: Internet access through PC, laptop or tablet

Introduction

This course covers the safe use of chemicals, biology and bed bug control methods.

Overview in brief

The course will help people plan and carry out effective bed bug control and management.

It focuses on the biology and of the insects, their habitats and the reasons for their control.

Plus, the course also highlights some of the risks of bed bug control.

The finer details

There are five modules in this course. A minimum score of 70% is required to pass it.

Upon successful completion, a Lantra certificate of training will be available to download and print.
