| Prerequisites: | Internet access through PC, laptop or tablet. |

## Introduction

This Health and Safety on Farms course will help learners understand the risks of working in agricultural environments and measure to help control those risks.

## Overview in brief

This course will help farmers, employees, and contractors working in agriculture to identify and understand legislation, risks and control measures to protect their safety and the safety of others.
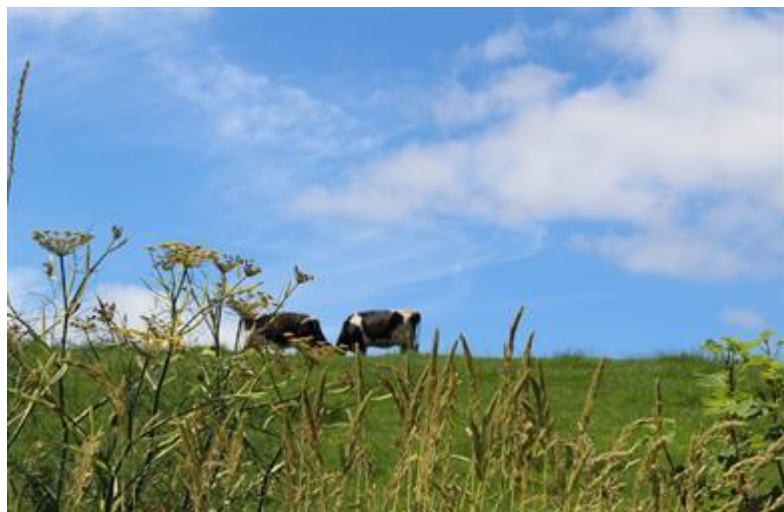

## The finer details

This course consists of four modules. A minimum score of 70% is required to pass it.

Upon successful completion, a Lantra certificate of training will be available to download and print.
