

Trees and Timber Measurement

At a glance...

Customised Provision

Duration Notes:	1 day
Recognised by:	Lantra Awards

Introduction

Gain an understanding of trees and timber measurement with this one day training course.

Overview in brief

This Lantra-accredited Customised Award is exclusively developed and delivered by a Lantra-approved Training Provider, who meets our quality standards. The course is specifically tailored to meet learners' needs. For further details about the course content and delivery locations, please contact the Training Provider using the details provided below.

The minimum age to undertake this course is 16.

This one day training course is aimed at landowners, woodland managers and land agents who have an interest in being able to estimate the volume of growing trees or timber within their woodlands.

Who should attend?

The course is aimed at landowners, woodland managers and land agents.

What will be covered?

By the end of the course, students will have covered the following outcomes:

- Explain why trees are measured
- Explain mensuration conventions
- Measure individual tree parameters

- Measure stand parameters
- Select appropriate methods of determining volume of individual trees and forest stands
- Establish the volume of an individual tree
- Establish the volume of a stand
- Measure timber by weight
- Visit an appropriate uniform stand to measure trees as an exercise.

The course is Lantra Awards accredited and the day will be split between classroom and woodland to provide students with both the theory and practical side of timber measurement.
