Training (with Assessment) Competence with Modules

Duration Notes:

The expected duration for the course is two days, however please note this may vary according to factors such as level of experience, modules or attachments selected, or the ratio of Instructors to Learners.

Introduction

Becoming proficient in operating this machinery is an essential and valued operator's skill for any contract, large or small.

Overview in brief

This course will equip you with the knowledge and confidence to operate the machine safely, protecting both you and those around you.

This course offers a range of certificate options depending on your needs:

- Articulated chassis up to 15 tonnes
- Articulated chassis above 15 tonnes
- Rigid chassis up to 15 tonnes tracked
- Rigid chassis up to 50 tonnes tracked
- Rigid chassis up to 15 tonnes wheeled
- Rigid chassis up to 50 tonnes wheeled.

The finer details

This training course has been developed to help you understand how to safely operate a dump truck.

The amount of instruction you will require will depend largely upon your previous experience and sessions will be adapted to meet your needs. Course duration will depend on experience and will be from one to four days.

The training course will consist of theory and practical sessions, followed by assessment. Course sessions include:

- Plant Safety and the Law
- Machine Knowledge and Preparation for Work
- Travelling and Manoeuvring the Machine
- Machine Operation
- Securing Loads and Safe Transportation
- Theory Assessment
- Practical Assessment.

If successful in meeting the required standards assessed, you will be awarded a certificate of competence and a Lantra skills ID card for your chosen certificate option.

Who should attend?

This course is for you if you need to become proficient in safely operating a dump truck.

As you'll appreciate, this course contains some practical activity that will require a minimum level of fitness. If you have any concerns, please speak to the Provider.

What will be covered?

At the end of this course, you will be able to:

- Describe the key requirements of health, safety and environmental legislation
- Interpret and comply with drawings, specifications, schedules, risk assessments and manufacturer's operator's manual (MOM) related to the plant or machinery operations and the work to be carried out
- Identify the hazards associated with plant or machinery operations and put the appropriate control measures in place
- Identify and explain the purpose of machine components and operator controls
- Conduct all operational and pre-start checks
- Prepare the dump truck for site and highway travel
- Drive the dump truck safely over varying types of terrain
- Operate the dump truck safely in restricted spaces
- Prepare the dump truck for loading procedures
- Complete a range of loading procedures
- Demonstrate how to safely discharge loads
- Shut down and secure plant or machinery
- Describe the procedures used for loading and unloading procedures on and off a transporter.
