

Utility Arboriculture Arboricultural Activities - Pruning from a Rope and Harness (Refresher)

At a glance...

Training (with Assessment) Competence with Modules

Duration Notes: 3 days

Prerequisites: Learners undertaking aerial pruning from a rope and harness must have completed a Level 2 Award in Accessing a Tree from a Rope and Harness and level 3 in Aerial Tree rescue.

It is also recommended that learners hold a valid Emergency First Aid at Work certificate.

Introduction

Refresh your skills on pruning a tree from a rope and harness with this 3 day course.

Overview in brief

Pruning trees can't often be done from the ground.

This course covers the pruning of trees at height from a rope and harness

The finer details

Who should attend?

The refreshers are designed to enable learners to develop their knowledge, understanding and skills to support their role(s) and develop their career in the management of vegetation in proximity to powerlines and meet the industry requirement for re-certification of skills every 3 years. It also provides an opportunity for learners to

obtain recognised certification, enabling them to continue to work within the utility arboriculture sector of the industry. The refreshers will enhance the ability of personnel to work safely, effectively and efficiently in the workplace, reducing unnecessary risks to themselves and others.

What will be covered?

- Be able to promote health and safety and industry good practice
- Be able to carry out aerial pruning of a tree
- Understand relevant health and safety legislation and industry good practice
- Understand how to carry out aerial pruning of a tree
- Identify the hazards and associated risks relating to the worksite and the operations to be done identifying appropriate control measures
