

Sainsburys AMBP Antibiotics in Dairy Cattle (E Learning)

At a glance...

E-Learning

Duration Notes:	2.0 - 2.5 hours minimum requirement
Recognised by:	Sainsburys; Red Tractor
Prerequisites:	Online access and suitable PC, laptop, tablet

Introduction

The Animal Medicines Best Practice (AMBP) was developed to provide robust training that represents current best practice in the use of medicines on farm.

Overview in brief

The course covers the fundamentals of antibiotics and antimicrobial resistance (AMR) with a mix of theory and practical applications such as on farm antibiotic management, responsibilities and best practice in responsible use.

The finer details

There is a minimum requirement to complete 3 modules. This must include two core modules, plus at least one focus module. The focus module is selected from a choice of 5, which include modules on mastitis, lameness, respiratory disease, calf scour and the disposal of antibiotic waste.
