Coventry, Warwickshire, CV8 2LG

What will be covered?

To understand the normal calving process in a cow

To be familiar with the common causes of dystocia and understand why we must intervene

To gain a practical knowledge of the important principles of intervention and know when Veterinary assistance is required

To obtain knowledge of possible complications post calving and how to reduce their incidence

To be aware of health and safety considerations when dealing with calving a cow

To gain sufficient knowledge in order to maintain high standards of animal health and welfare in the management of periparturient cows
