Lantra, Lantra House, Stoneleigh Park,

Coventry, Warwickshire, CV8 2LG

Both days of the course have a combination of:

- Hands-on training throughout the day, to provide learners with real-world practical experience that can be utilised when on site.
- Practical assessments throughout to ensure competent understanding of each task & subject.

Day 1 – Site Surveying

- Understanding a site & its requirements
- Site assessment
- Understanding measurements & scale
- Understanding site levels & levelling
- Using surveying & levelling equipment & plotting areas

Day 2 – Site Setting Out & Prep

- Understanding HSE procedures
- Understanding excavations, volumes & quantities and falls & gradients
- Installation of sub-base options and foundations
- Drainage
- Setting out
- Theory test

Who should attend?

Contractors in the Domestic landscape industry,

New landscape companies,

Apprentices and semi-skilled staff,

Career changers,

Army Veterans.

What will be covered?

This 2-day course combines theory and practical training, to ensure the learner has a full understanding of the essential requirements for surveying & setting-out sites and preparing a site for landscape construction. The attendee will gain:

- A comprehensive knowledge of health & safety requirements for site during the construction phase to ensure the safety of yourself and others.
- An understanding of design plans, site plans and considerations how these reflect the site and project requirements when constructing on site.
- Full understanding of selecting the correct materials, tools and equipment for the preparation of construction on site.
- An understanding of working with setting-out points, datums, baselines and levels to achieve accurate planning and progression of the construction phase including dealing with site features, and regular and irregular forms.
- A full understanding of how to work with measurements, scales, levels, gradients, site variations and how to overcome difficult obstacles you may find on a site.
- A full understanding of how to competently operate site survey equipment, including the use of traditional techniques, automatic levels (dumpy levels), rotating levels (laser levels) and altimeter levels (zip levels).
- Full understanding of calculating areas, volumes and quantities for paving installation.
- Full understanding of excavation requirements in line with industry standards to achieve desired patio or paving finish.
- Full understanding of sub-base construction methods required for landscaping projects to meet industry standards.
- The ability to competently set-out a proposed landscape scheme in preparation for construction.
- Hands-on training throughout the day to provide learners with real-world practical experience that can be utilised when on site.
