

## NHSS12D Instructor:Learner Ratios

**May 2019**

Please would all 12D T1 –T7 instructors ensure that they are working to the current version of the Instructor Guidance Notes.

Instructor : Learner Ratio	
12D T1	1:12
12D T2	1:12
12D T3	1:8
12D T4	1:8
12D T5	1:6
12D T6	1:8
12D T7	1:12

Please note that the Temporary Traffic Management Basic Course (TTMBC) instructor:learner ratio is 1:12.

**Important Note:** The T5 Instructor/Learner ratio differs from T3, T4 and T6 since it includes a significant practical element during which learners (normally in pairs) are required to install and remove a multi-phase traffic signal configuration along with all associated signing etc. A ratio of 1:6 allows the appropriate time required to carry out the practical element and also takes into consideration that some of the learners may never have used a multi-phase signal controller.

With regards

Lantra
