

Subject: Enhanced Mobile Carriageway Closure (EMCC)

Date: 22nd February 2023

Lantra would like to notify industry that a new EMCC **Customised Provision** training course is available for delivery.

EMCC is an alternative method for creating traffic free zones on motorways; live carriageways. The new TTM technique has been developed by **Chevron Traffic Management Ltd** and accepted for use by National Highways. When undertaking an EMCC operation, the operator of the vehicle needs to be a competent, qualified individual and they will have completed a nationally recognised training course in the use and operation of the EMCC technique.

For further details on the technique itself please contact: keith.smith@chevrontm.com
