Land-based and Environmental Industries

Businesses in the land-based and environmental sector enhance the quality of life for everyone in the East Midlands. They improve well-being, supply quality assured food production, ensure the health and welfare of animals, provide leisure activities, enrich the rural environment and urban green space and protect our natural heritage.

### Overview

**Business figures**
- Official statistics estimate that there are 12,750 businesses in the sector in the East Midlands.
- As official data excludes many land-based and environmental businesses, Lantra estimates there are about 16,250 businesses in the sector in the region.
- Estimated figures are 27% greater than the figure obtained through official data sources.

**Businesses by size**
- The sector in the region is dominated by micro-businesses.
- 96% of businesses in the sector in the East Midlands have a workforce of ten staff or fewer, compared with 82% across all sectors in the region.

**Employment figures**
- Official statistics estimate that there are 46,600 people employed within the sector in the East Midlands.
- As official data excludes many land-based and environmental employees, Lantra estimates there are about 81,500 employees in the sector in the region.
- Estimated figures are 75% greater than the figure obtained through official data sources.

### Employment

- Employee 62%
- Self-employed 35%
- Unpaid family worker 3%

### Ethnicity

- White 98.2%
- Non-white 1.8%

### Occupations

- Managers and senior officials (e.g. farm, forest, shop, zoo or practice managers) 14%
- Professional occupations (e.g. veterinary surgeon, manufacturing service engineer) 5%
- Associate professional and technical occupations (e.g. community ranger, head green keeper) 2%
- Administrative, clerical and secretarial occupations (e.g. farm secretary) 6%
- Skilled trade occupations (e.g. farmer, tree surgeon, florist) 43%
- Personal service occupations (e.g. veterinary nurse) 3%
- Sales and customer service occupations (e.g. pet shop assistant) 4%
- Transport and machine operatives (e.g. tractor/machine/chainsaw operative) 7%
- Elementary occupations (e.g. fruit picker) 15%

### Learning supply

- Learning supply information for the region is not available, therefore England data is used
- The sector is served by approximately 270 providers
- 34 of these are specialist land-based providers and are members of Landex
- An estimated 109,000 learners undertook sector qualifications or training courses in 2008/09
- For further information about current provision, please refer to Lantra’s Assessment of Current Provision for England.

### Employment projections 2010-

- In the next ten years (2010 to 2020) the sector will need 15,000 more people
- The largest need for people is expected to be for sales and customer service occupations (3,000) and managerial occupations (3,000)
- Over the period 2010-2020, the following number of people will be needed:
  - 3,000 people at Level 4 and above (graduate)
  - 4,000 people at Level 3 (A Level)
  - 4,000 people at Level 2 (GCSE A-C)
  - 3,000 people at Level 1 (GCSE D-G)
- Forecasts suggest that 2,000 people without qualifications will be needed.
Skills issues

Regional information for skills issues is not available for the sector, therefore England data has been used.

Incidence of skills shortage vacancies

- Of the sector employers, 7% had a vacancy at the time they were surveyed
- The most common reason for vacancies was due to skills shortages. This is compared with 12% for all employers and highlights the low level of vacancies within the sector.

The sector has changed in recent years leading to an increase in demand for highly skilled staff. Current skills employers feel are important to the sector are:

- Technical skills (e.g. animal handling and care; disease identification and control; implementing new technology including genetic engineering)
- ICT skills (e.g. robotics)
- Leadership/management skills (e.g. succession planning; entrepreneurial skills)
- Essential skills (i.e. literacy, numeracy and communication).

Drivers for change

Economic conditions

- Impact of the recession
- Understanding and responding to changing consumer demand
- Urban/rural regeneration
- Sustainability/globalisation of markets.

Impact on skills

- Business advice, guidance and support
- Business management skills
- Sales and marketing
- ICT and commerce.

Labour supply

- Attracting skilled new entrants of all ages
- Succession planning by industry
- Providing opportunities for career progression and development
- Influencing migration policy.

Impact on skills

- Effective marketing of careers
- Better careers advice and guidance for all
- Proper recognition of competence for all
- Integrated frameworks to support lifelong learning and Continued Professional Development (CPD)
- Entrepreneurial education.

Climate change

- Reduction in greenhouse gas (GHG) emissions
- Voluntary action plans to reduce GHG
- Need to adapt to changing climate in the longer term
- Increased incidence of flood events.

Impact on skills

- Adoption of methods to mitigate climate change, such as sustainable business practice
- Businesses having to respond to climate change
- Respond to specific skills/re-skilling issues.

Energy and fuel security

- Cost to business of fuel and energy
- Use of waste as a resource, e.g. anaerobic digestion
- Sector as a supplier of bio-mass and bio-fuel.

Impact on skills

- Research community to provide knowledge
- Knowledge of new agronomy techniques
- Development of bio-mass supply chains.
Food safety and security
- Food 2030 strategy, increased Government interest in food security and continuity of supply
- Food quality, traceability and quality assurance
- Proposals on food information for consumers
- Consumer behaviour with demands for greater convenience and healthy lifestyles
- Developments in trade markets and supply chains
- New approaches to land management i.e. conflicting priorities for land use, water framework directive.

Impact on skills
- Business management skills
- Risk management
- Business advice, guidance and support
- Information and communications technology
- Supply chain management
- Contract management and negotiation
- Production methods and animal welfare
- Sales and marketing
- Catchment sensitive land management.

Animal health and welfare
- Higher standards required of all people handling animals
- Legislation relating to animal transport.

Impact on skills
- Development of integrated CPD across all practitioners
- Recognition of competence
- Skills relating to animal handling and care, disease identification, control and bio-security.

Health and safety
- Legislative requirements
- Safer working environment
- Reduction in occupational hazards to minimise ill health.

Impact on skills
- Awareness raising, knowledge of requirements and how to comply
- Improved learning provision in terms of CPD
- Recognition of health and safety competence.

Technology change and knowledge transfer
- Increasing business efficiency through technology
- Environmentally sustainable businesses
- Better integration of knowledge transfer into skills programmes.

Impact on skills
- Research into new methods and processes, e.g. soil science, animal nutrition, advanced agronomy and pathology
- Technology transfer
- Business development
- New technologies (i.e. precision farming and use of Global Positioning Systems [GPS])
- Higher level technical skills for new production methods
- More flexible employer focused training.
